FLUOMONSTERS

Fluomonsters stems from the visionary idea of juxtaposing the futuristic forms of modern and contemporary buildings with abstract skies in vivid, saturated hues, as if handpicked from the rainbow's palette.

Through this approach, these structures -sometimes iconic examples of contemporary architecture, sometimes hidden and unknown- take on a new perspective. They shed the coldness of their materials, almost personify themselves, and merge with their surroundings in a reimagined harmony of lines and colors, transforming into “fluomonsters.”

Each viewer is invited to dream and discover their own favorite fluomonster.
